

I hope everyone is having a good weekend! There are a few important updates for Monday that I wanted to be sure the parents were all aware of:

1. Our 14 Days of Giving had a great end of the week- we earned TWO prizes for students on Friday thanks to the monetary donations. This means that our students have earned both a PJ Day AND Crazy Hair Day...BOTH ON MONDAY! (Yay! Please take a moment of silence to think about the teachers during the day on Monday =))
2. Pictures and links of the students' invention projects are posted on the class website. If you want to see them, go to www.NanceNinjas.com > Grandparents Day 2018 (at the top). There are pictures from GP Day, the video shown to the grandparents, and pictures/links/ads for each student group. (The video is long, but super cute. There is dancing at the end, too!) I am still making sure links work and finding pictures that need to be added, but the bulk is finished.
3. The Math Virtual Lesson 2 is due Tuesday. It is through IXL. They have 3 sections to practice.
4. The Math page is updated for the next unit: Coordinate Grids. It will be an easier unit for most students (and parents!).
5. I am working this weekend on the several grades for the invention project and the math test. I'm hoping to get it done this weekend, but it is a lot, so it may take until sometime during the school week to complete it all. I will start entering grades this weekend, though, even if they aren't all finished.

Have a great rest of the weekend, and stay warm out there!
